Image Sizing & Miscellaneous: Images cannot be wider than 1920 pixels and they cannot be higher than 1080 pixels because that is the display resolution of the projector.

- Most images (including ALL vertical images) are constrained by the 1080 Height limitation.
- Only images that are twice as wide as their height (or wider) are constrained by the 1920 Width limitation.
- Images submitted at larger sizes than this maximum will be downsized to conform to the projector restraints. The results may not be what you intended, so please do the resizing yourself to ensure the best results. If time permits before the submission deadline, oversize images will be returned to you for resizing.
- Consider removing labels and ratings from your submitted images. These will be removed anyway, in order to eliminate any subliminal influence on the judges.

Submission Deadlines:

- Monthly meeting images must be submitted by midnight of the Saturday before the meeting. This allows time for the presentation to be built and for the judges to Preview the images.
- Special events, such as POY and Scavenger Hunt, must be submitted by midnight of the date specified in the event announcement.
- As a practical note, the final download of images for an event will be the morning after the final submission date. If your images are in the email inbox before that final download, they will be accepted. Images arriving after the final download will be refused.
